

Role Title:	Project Planner
Position:	Permanent
Location:	Greater Belfast
Remuneration:	Competitive salary commensurate with the level of the role

Overview:

Artemis Technologies is an applied technology spin-off from the Artemis Racing America's Cup Team, founded in 2017 to commercialise the hydro-foiling and tool chain intellectual property developed by the team. Providing engineering services to high-performance and commercial clients and led by double Olympic gold medalist, Dr Iain Percy OBE, the Artemis Technologies team comprises global experts from the fields of maritime, yacht design, aerospace and motorsport. Artemis Technologies is supported by a superb consortium of engineering and academic partners, with funding from UK Research & Innovation (UKRI), in pursuit of research and development excellence.

The Role:

The Project Planner will report to the Chief Operations Officer and is responsible for creating and maintaining fully integrated plans and schedules for Artemis Technologies' projects, across the full breadth of disciplines and functions. The Project Planner will collect inputs from all technical teams and support functions and will develop and maintain an accurate and integrated schedule of activities and key project milestones. The Project Planner will work collaboratively with the relevant planners within each team to ensure the appropriate level of detail and integration of planning information is made available.

Key responsibilities include developing and maintaining the overall integrated project schedule and integration of all scopes of work and supporting schedule change management processes.

The Project Planner will interface with stakeholders conducting planning activities in individual teams, to ensure a thorough understanding of planned activities regarding their potential impact on the schedule and ensure all interfaces between functions and disciplines are clearly defined within the integrated plan.

Additionally, the Project Planner will develop and maintain project progress and performance reporting, working in close liaison with all disciplines, departments, project personnel and contractors to ensure all key planning inputs are linked into a fully integrated plan.

The Project Planner will update and maintain weekly and/or monthly progress reports, providing variance commentary where applicable and maintain and develop current awareness of relevant planning technology whilst driving continual improvement and effective compliance throughout their work and engagement with all stakeholders.

The Person:

The Project Planner will be qualified in Project Management (or a similar technical discipline) to a minimum of HNC/HND level (or equivalent). Ideally the Project Planner will possess significant planning experience, ideally within boat design/development or other maritime or high tech / high R&D focused engineering activities. Being well versed in concurrent engineering in a complex environment is highly sought after for the post, in addition to working in fast paced environments.

Excellent IT skills are required for the role including a high level of proficiency in Microsoft Office, including Project or Primavera (or other equivalent planning tools), coupled with the ability to analyse and solve issues independently. You will possess excellent analytical, organisational and time-management skills and be able to communicate effectively, in all formats, to all stakeholders.

Artemis Technologies operates in a truly collaborative and values-led format, offering exceptional opportunities to all employees. The Project Planner will work openly and supportively with other stakeholders and team members demonstrating agility in their working style, energy and passion in their delivery and embrace a mindful and supportive style of working to support the operational goals being achieved.

This is an incredible opportunity to join a rapidly growing business with a true vision and mission: - coupled with a passion for delivering cutting edge innovation to aid the decarbonisation of the maritime sector.

Closing Date: 8th February 2021
